

NASA ASTROBIOLOGY INSTITUTE
ANNUAL REPORT YEAR 
[July 2002 - June 2003]

Team Projects: University of Colorado, Boulder

University of Colorado, Boulder Project Reports

[Biogeochemistry of the Early Earth](#)

[Molecular Survey of Microbial Diversity in Hypersaline Ecosystems.
Ecogenomics](#)

[Recruitment of Proteins to Serve New Functions](#)

[Habitability of Planetary Bodies](#)

[Potential habitability of Mars](#)

[Philosophical Issues in Astrobiology](#)

[The Formation of Planets Around Young Stars](#)

[Initiation of an RNA world](#)

[Symbiosis and the origin of multicellularity in photosynthetic organisms](#)

[Identification and Study of Hydrothermal Systems on Mars Through Remote Sensing: Analysis of Regions of High Spectral Variance](#)

[Organic and sulfur hazes in the Archean atmosphere: Climatic and photochemical consequences.](#)

[Diversity and function of the sulfur–cycling community in hypersaline microbial mats](#)
